Following publication of article [1] we noted an error in the methods section of our abstract in which we state: “Global MD was significantly higher in the septum than the reference lateral wall ( $0.784 \pm 0.188$  vs  $0.750 \pm 0.154 \times 10^{-3} \text{ mm}^2/\text{s}$ ,  $p < 0.001$ ).” The word “Global” was not correct, and the reference value was incorrect, this should state: “MD was significantly higher in the septum than the reference lateral wall ( $0.784 \pm 0.188$  vs  $0.714 \pm 0.155 \times 10^{-3} \text{ mm}^2/\text{s}$ ,  $p < 0.001$ ).” All other information is correct, we apologize for any inconvenience caused by this error.
